

Boot Camp Project Group Agreements

Add this file to your team's repo next to the README.md and call it group-agreement.docx.

What is your team name? WNS

What is your project about? As someone who is sensitive to air quality I want to be able to check the quality in a specific area and see what events are going on.

What role(s) will everyone on the team hold: Will - GitHub Manager and Air Quality API; Shafat - Ticketmaster API; Nat - Frontend and CSS/Framework

How often will you have meetings? How long? 3 times between now and presentation (1/3/2022-1/12/2022) for one hour outside of class

How will you keep track of tasks? Github projects and text chain

What if someone misses a deadline? Reach out to one another to stay on top of things and to help one another if they are falling behind. If someone misses a deadline then they will reach out to TA's or tutors or extra help on what they struggled with.

What happens if someone misses a meeting? What is their responsibility? The team's responsibility?

Reach out to one another to stay on top of things and to help one another if they are falling behind. If someone misses a deadline then they will reach out to TA's or tutors or extra help on what they struggled with. If someone has to miss a meeting they will give teammates an hour heads

How does each team member like to receive feedback? Honest, respectful, and give helpful feedback and directions.

What if there is friction between members? How will you address it?

Get on chat with each other and go over issue in orderly way. Resolve issue quickly.

Other Group Agreements:

Thursday - framework for project is setup and we have idea of how to use the API's appropriately

Saturday - Project is close to operational with initial framework of website laid out

Sunday - Quality control and meet if need be

Monday - by class time Monday have application functioning

Tuesday - practice presentation and finalize application

Wednesday - present application
